

Talatha Rural Community Water District

October 30, 2023

Dear Member:

Subject: **Service Line Inventory on customer's side of meter**

Dear TRC Water District Customer,

Talatha Rural Water is working on building a Lead Service Line Inventory. On August 4, 2022, the (EPA) Environmental Protection Agency released guidelines for developing and maintaining a service line inventory for all water systems. It requires water departments to know and document what type of lines are on each side of the meter.

We need your assistance in finding out what type of lines you have on your side of the water meter. **Please take a moment to complete and return the following information** in effort to develop an inventory of lead pipes on the customer's side of the meter.

If you have any questions, please call the office during business hours. Monday-Thursday 8:00-4:00/ Friday 8:00-1:00 at 803-652-1381

Address location: _____

Current pipes: (Circle One)

Plastic Lead Galvanized Unknown

Approximate date line installed: _____

How was this verified: (Circle One)

Visual or Documentation

Please return by mail, drop by the office or call, Thank you for your help!
